

Telvent to manage the Alcobendas local authority information systems

Madrid, May 27, 2005 – Telvent (NASDAQ TLVT), the Global RealTime IT Company, recently signed a contract with the local authorities of Alcobendas in the Autonomous Region of Madrid, to manage and administer all of its information systems and the outsourcing of backup services for its computer applications. Alcobendas local authority has decided to outsource these services due to the special importance of these applications and information systems as they demand a high availability level for addressing the requirements of citizens.

In this project, Telvent will perform the remote monitoring of the applicable systems and will also provide immediate customer service attention for any possible incidents that might arise. In addition, Telvent will guarantee availability of the systems 24 hours a day, 365 days a year, and will maintain offsite data backup that will enable immediate recovery of information in the event of any disruption of normal operations occurring in the Local Authority data protection center. These services will be housed in Telvent's facilities.

According to Telvent's Chairman, Manuel Sánchez Ortega, "We have become a company of reference for public administrations in providing solutions for information, telematic security and communications systems. Telvent is currently developing these types of technological solutions for the public business enterprise Red.es for the Regional Government of Andalusia and Madrid City Council's municipal company Promoción Madrid."

Telvent currently has the largest network of Contingency and Disaster Recovery Centers on the Iberian Peninsula, with a total surface area of 60,000 square meters, consisting of five neutral Data and Communications Centers located in Madrid (two centers), Barcelona, Seville and Lisbon, and more than 300 customers receiving neutral housing, backup center, BRS and managed services.

Telvent offers a wide range of information technology systems and services for specific industrial sectors and is the leading company in Spain, North America and Latin America for real-time mission-critical and high added value solutions, with more than 30 years experience.

Telvent (NASDAQ TLVT), the Global RealTime IT Company, specializes in high value-added solutions in four specific industrial sectors (Energy, Traffic, Transport, and Environment) in Europe, North America, Latin America and China (www.telvent.com)
